Line Taps

Diversitech DLT Line Taps and Control Valve

The quick, safe and easy option to charge, recover and test a line. Simply clamp on the DLT valve, attach the DCV-1G control valve, and pierce the line. The control valve features a port for connecting charging lines or gauges. The valve can swivel to any position and also be removed and re-used. Available in three sizes from 3/16". OD tube size to 5-1/6". The DCV-1G is designed for use with all three sizes.

Supco BPV 31 Bullet Piercing Valve

The ONLY valve with a permanent type, patented gasket application. Sealing force of over 180 inch lbs, torque tested with 450 lbs. Pressure tested at 250°f patented valve gasket provides 50 times more sealing area than competitive 'o' ring types, corrosion resistant piercing needle is engineered for concentricity and hardness to insure perfect seating every time. 500 psi maximum pressure. No adapter valve required, requires only 2" clearance for installation and operation hex key wrench included.

P008	BPV-31	1/4, 5/16, 3/8

Diversitech Quick Tap

Features a schrader valve core in the 1/4" male port. Simply pierce the line and back seat the needle. Flow starts when depressor type charging hose is connected. Flow shuts off automatically when hose is removed. If valve core is not desired, it may be removed. Connect hose, pierce line and back seat needle. This method offers full unrestricted flow. Valve core can be removed or changed at any time without loss of refrigerant if needle is front seated.

P023	QTH-2	1/2, 5/8

MAC - The Ultimate Line Piercing Valve

Mac valve features a uniport single connection for piercing and servicing. Needle depressor is inserted into head of needle. Wing cap is turned down easily by hand until line is pierced. Sealed with refrigerant resistant 'O' rings the needle automatically back seats after servicing. Very compact line tap valve when access is an issue.

Access Fittings

We offer a wide range of access valves and fittings designed for quick and easy installation for both service and installation work. They can be installed anywhere on either the low side for charging, purging, quick testing or pressure checking. Our access fittings have 1/4 SAE male flare access ports and include a quick seal cap and have a stainless and brass core Schrader valve fitted.
