Copper Tube

Cooleo Pre-Insulated Copper Tube

- Allows you to install your pipework in half the time of conventional methods.
- 9mm insulation manufactured to EN 13501. Fire classification - WHITE 9MM BL-S1-D0 BLACK 9MM BL-S2-D0.
- 13mm insulation manufactured to EN 13501. Fire classification - CL-S2-D0.
- 13mm wall black insulation with tough & durable polyethylene coating.
- Copper coil manufactured to EN 12735-1.
- Can be easily separated during insulation.
- 9mm & 13mm wall black available to order.
- 9mm wall white available to order.

FSW **cooleo** Pre Insulated Copper

The Benefits

- Labour saving.
- Easy clean coating.
- Easy to transport & store.
- Durable insulation coating.
- Less waste, re-cap and re-use.
- Insulation more resistant to damage.

Available in black 9mm & 13mm (20M coils) insulation, white 9mm insulation

Glycol solution for heat pumps available from FSW

Glycol - Accessories

GLY-COOL+® (MPG) is a high performance, monopropylene glycol.

(MPG) based, heat transfer fluid designed for use in indirect cooling in food processing and beverage cooling applications.

GLY-COOL+ (MPG) fluids have been specifically designed to deliver higher resistance to degradation, scale, bacterial growth and corrosion.

Code	Model	Description	Price
GLYCOOL (MPG)	25LTR	Monopropylene Glycol	POA

FRIOGEL® NEO is a concentrated antifreeze based on monopropylene glycol and corrosion inhibitors, is a heat transfer fluid for low temperature refrigeration systems and food industry.

When FRIOGEL® NEO is diluted in water, the resulting liquid cooling agent provides effective protection against freezing and gives re-enforced protection against metal corrosion in the various ancient and new types of circuits (steel, aluminium, copper, brass, soldering, etc.) This protection has been confirmed by numerous static and dynamic heat tests.

Refrigeration

Testo 557s Manifold

R32 ready!

- All results at a glance.
- Automatic Bluetooth connection.
- Fast and easy pressure value display.
- Robust housing with IP54 protection.
- Test menu sequences for pressure leak test, vacuum, target superheat, and discharge line temperature.

The Testo 557s digital manifold with 4-way valve block enables you to carry out your measurements on refrigeration and air conditioning systems and heat pumps. The large display also helps you to evaluate the results in graphic form. Stored programs guide you through the measurement and enable the automatic determination of numerous important system parameters such as superheating/ subcooling, target superheat, cooling/heating capacity and many other areas besides.

Testo 549i Manifold

R32 ready!

- Measurement of high and low pressure.
- Low refrigerant loss – since no hoses are required for measurements.
- Measurement data displayed in the form of a graph or table, and sent via testo Smart Probes App.

The ever-popular Original Refrigeration Smart Probe Set from testo has a NEW Big Brother the 0563 0002 10 is a revised version of the original model. The New model features updated 549i refrigerant pressure probes with 45° angled connector to allow for easier access to test ports. Both the 549i and the 115i supplied in the New version of the testo refrigeration Smart probe set, feature the New Bluetooth module to allow 100m operating range.

Testo 552i Vac Gauge

R32 ready!

- Fast and easy vacuum measurement.
- Robust housing with IP 54 for maximum reliability in daily use.
- Integrated 45° angle.
- Connects automatically to the testo Smart App.
- One app for everything.

Testo smart tools connect to your smart phone!

The Testo 552i wireless vacuum probe provides the Testo smart probes portfolio with the option of measuring vacuum wirelessly and via just one service port. This prevents leaks and means that you do not have to pull the vacuum through the manifold. The integrated 45° angle allows you to work flexibly at any service connection. The Testo 552i automatically connects to Testo 550s and Testo 557s via Bluetooth. Used with the Testo smart app, the smart probe is also perfect for quick vacuum measurement on its own. Thanks to its proven quality and great durability, you can rely on your wireless vacuum probe in any conditions.

Javac Gas Mate Leak Detector

R32 ready!

- Also detects TRACE-A-GAS - sensitivity hydrogen 5 grams a year.
- Detects natural gas, propane, butane, cyclo pentane, ethane, ethanol, isobutane and ammonia – R1234YF, R1234ZE, R32, R290, R600

The Javac Gas Mate is an ATEX approved leak detector suitable for R32 and all standard refrigerants and hydrocarbons and twice as sensitive as the nearest competitor.

- Adjustable sensitivity helps pinpoint leaks fast.
- Auto-zeroing for ignoring background gas levels in leak test area.
- Certified intrinsically safe by MET Laboratories for use in combustive / explosive environments.

Electrical

Electrical measuring instruments

The new generation - Testo sets new standards in electrical measuring technology.

Whether multimeters, clamp meters, current testers or voltage testers – thanks to innovative technologies and simplified application, Testo's measuring instruments measure electrical parameters such as current, voltage or resistance more reliably and precisely than ever before.

Find out about service, calibration and training as well. For better performance in electrical measuring technology.

Recovery Unit

Ultra-fast, high volume refrigerant recovery. The G5Twin is designed to reliably pump liquid without any need for throttling, cutting down on overall recovery time.

At only 24lbs, the industry-leading G5Twin (240V) is the smallest and lightest recovery machine capable of handling the tough demands of industrial/commercial refrigerant recovery - no job is too big for this little beast. Designed for use with all common refrigerants, including R410A, the G5Twin pumps liquid and vapor without throttling. Featuring twin cylinders, twin condensers, a refrigerant-isolated crankcase and a turbine fan blasting over 700cfm of airflow for cool, durable, powerful operation.

NAVTEK

Digital Scales

The NAVTEK NRS3i01 Bluetooth Electronic Refrigerant Scale is designed and reinforced with advanced technology, providing more precise and portable refrigerant charging technology.

Through the bluetooth connection, you can perform other tasks while charging. While real-time refrigerant charge is transmitted to the handheld device, it will buzz when the charge is within 50 grams of the setting to alert the operator to stop the charging once the setting is reached. The heavy duty magnesium alloy weighing pan and ergonomic, one-piece, portable design make it lighter and easier to carry.
