## M11 Unistrut Clips

- Sizes: M1108 - M1151 (9.5mm - 269mm)
- Fits 20mm & 40mm Unistrut Channel
- Supplied with Bolt and Nut
- Used in various pipe restraint installations

**Box quantities available from stock at FSW**

# Copper Tube

## Cooleo Pre-Insulated Copper Tube

ONLY  
Available  
from  
**FSW**

### FIRE RETARDENT PAIR COIL

- PairCoil allows you to install your pipework in half the time of conventional methods.
- 9mm Insulation manufactured to EN 13501. Fire classification - BL-S2-D0
- 13mm Insulation manufactured to EN 13501. Fire classification - CL-S2-D0
- 13mm wall black insulation with tough & durable polyethylene coating
- Copper Coil manufactured to EN 12735-1
- Can be easily separated during insulation
- 9mm & 13mm Wall Black available to order
- 9mm Wall White available to order

**FSW** 

### The Benefits

- Labour saving
- Easy clean coating
- Easy to transport & store
- Durable insulation coating
- Less waste, re-cap and re-use.
- Insulation more resistant to damage

Available in Black 9mm & 13mm Insulation, White 9mm Insulation

## Glycol - Accessories

**GLY-COOL+® (MPG)** is a high performance, Monopropylene Glycol

(MPG) based, heat transfer fluid designed for use in indirect cooling in food processing and beverage cooling applications.

GLY-COOL+ (MPG) fluids have been specifically designed to deliver higher resistance to degradation, scale, bacterial growth and corrosion

Code	Qty	Description	Price
GLYCOOL (MPG)	25LTR	Monopropylene Glycol	POA

**FRIOGEL® NEO**; a concentrated antifreeze based on Mono Propylene Glycol and corrosion inhibitors, is a heat transfer fluid for low temperature refrigeration systems and food industry.

When FRIOGEL® NEO is diluted in water, the resulting liquid cooling agent provides effective protection against freezing and gives re-enforced protection against metal corrosion in the various ancient and new types of circuits (steel, aluminium, copper, brass, soldering, etc.). This protection has been confirmed by numerous static and dynamic heat tests.

## Refrigeration

Testo 557 Manifold

Calculation of superheating and subcooling in real time  
Connect to smartphone/tablet app: remote monitoring  
Precise external Pirani gauge for vacuum measurement

Testo 549i Manifold

Measurement of high and low pressure  
Low refrigerant loss – since no hoses are required for measurements  
Measurement data displayed in the form of a graph or table, and sent via testo Smart Probes App

The **testo 557** digital manifold fulfils numerous functions, which are required for working on refrigeration systems and heat pumps, in just one instrument: for example superheating/subcooling calculation, vacuum measurement, temperature-compensated leakage test. You can also use a practical app to monitor the manifold via your smartphone/tablet and store the measurement results or send them by e-mail.

The ever-popular Original Refrigeration **Smart Probe Set** from testo has a NEW Big Brother the 0563 0002 10 is a revised version of the original model. The New model features updated 549i refrigerant pressure probes with 45° angled connector to allow for easier access to test ports. Both the 549i and the 115i supplied in the New version of the testo refrigeration Smart probe set, feature the New Bluetooth module to allow 100m operating range.

TESTO557	557	Digital Manifold	POA
TESTO549i	549i	Smart Prob Digital Manifold	POA

Testo 552 Vac Gauge

- Measurement data monitoring via testo Smart Probes App
- Extremely precise, extremely rugged, extremely practical
- Measures pressure and calculates the evaporation temperature

The **testo 552** is a digital vacuum measuring instrument for the evacuation of refrigeration systems and heat pumps. It measures even the smallest absolute pressures and provides highly precise information on the status of the dehumidification of a system (removal of foreign substances, incl. oils or foreign gases). In addition to the above, the new version of the testo 552 connects via Bluetooth with the testo Smart Probes App on your smartphone or tablet. This allows you to monitor the absolute pressure reached during the evacuation and measurement results are documented in the App and sent by e-mail report.

Testo Smart Tools  
Connect to your smartphone!

Testo 316-3 Leak Detector

- Can detect all the most common cooling agents
- Highly sensitive – detects even the smallest leaks
- Easy-to-use one-button operation
- Complies with specifications for F gases regulations

Detects even the smallest leaks thanks to its high sensitivity < 4 g/a  
Complies with EN14624, fulfils the requirements of the F-gas regulation.  
Detects all common refrigerants including R32, R1234yf, R448A and R449A  
Easiest possible operation thanks to a single button  
Immediate readiness with no pre-settings  
LED indicator of leakage with simultaneous audible alarm

Detectable refrigerants: All common refrigerants including new HFO based products such as R32, R448A, R449A, plus legacy CFC, HFC and HCFC products such as R22, R404A and R507.

## Electrical

### Electrical measuring instruments

The new generation Testo sets new standards in electrical measuring technology.

Whether multimeters, clamp meters, current testers or voltage testers – thanks to innovative technologies and simplified application, Testo's measuring instruments measure electrical parameters such as current, voltage or resistance more reliably and precisely than ever before.

Find out about service, calibration and training as well. For better performance in electrical measuring technology.

## Temperature/Humidity

### Get even Smarter with the testo Smart Probe Range.

Why not turn your smartphone into a thermometer or even a vane anemometer with the new testo smartprobe range and FREE App.

Easy to use smart probes for every day measurement tasks performed within the HVAC-R Sector

Smart probes to measure temperature, pressure, humidity and airflow.

## Recovery Unit

The Value® VRR24L is a lightweight yet powerful recovery machine weighing only 13.5kg.

Its powerful 1 horsepower single cylinder oil less compressor will recover 30kg of vapour and 210kg of liquid per hour. Easy to use mode selector switch and high pressure safety cut out.

Plug in kettle type mains lead included.

This machine is also suitable for recovering those larger plants quickly and efficiently such as water chillers and packs etc.

R32 Ready!

VRR24-L	
Recovery per/hr	
Vapour	30 kg
Liquid	210 kg

Recovers all commonly used CFC, HFC & HCFC refrigerants.

**NAVAC**  
Empowering you to work smarter

## Digital Scales

The NAVAC NRS3i01 Bluetooth Electronic Refrigerant Scale is designed and reinforced with advanced technology, providing more precise and portable refrigerant charging technology.

Through the bluetooth connection between handheld device and electronic charging scale, you can perform other tasks while charging. While real-time refrigerant charge is transmitted to the handheld device, it will buzz when the charge is within 50 grams of the setting to alert the operator to stop the charging once the setting is reached.

The heavy duty magnesium alloy weighing pan and ergonomic, one-piece, portable design makes it lighter and easier to carry.

## Test Meters

The **Value**® **VCM-202** is feature packed Digital Clamp Meter that represents great value for money.

Measure AC/DC voltage, AC current, resistance, diode and reads °C/°F with included K probe and case.

Auto shut-off, low battery alarm and 250 volt overload protection Max measurements: Volts 600, AC current 400 amps, Temp -40°C to +1000°C.

The **Value**® **VCDM-151** is another quality meter from **Value**® at a very competitive price.

Measures 30 different ranges, has overload protection. Great for testing capacitors up to 200 µF Measures temperature -40°C to +1000°C

Test leads, K probe & 9V battery included.
